

I would like to request that you continue to allow K-love to air in my area as well as all others. It has been such a benefit in my life there are so many times that it has uplifted me and given me hope during down times. It has also helped bring my family closer together and closer to God, it is something that we all agree upon to listen to. It also effects the community by making it a more generous community I see people all over listening to it and it helps us to realize what is important in life and that there are other persons out there with problems greater than ours that we can help, it also helps to the community to know about different events in the community that you wouldn't hear about on a regular radio station. I would also like to state that it has greatly helped my daughter to make friends with those she wouldn't normally, she is on her schools sports team, but she is not considered a popular student, well one day while they were all running she started singing one of the songs that she had heard on Klove and about 5-6 other girls started singing with her, she didn't even think they knew of the song let alone Klove and so they started talking and it kind of brought the group together and as I stated before it was popular and not so popular girls. Please don't take my Klove away, we all need it desperately in our lives.
